PROJECTS

i-Neer

Water Management Panel

- Developed and maintained dashboard pages displaying detailed tank information with dynamic filters for quick insights
- Built report pages for detailed analysis with export functionality, ensuring responsive and user-friendly UI/UX

S-Tank

- Developed dashboard pages with card-based data including Tank Level, Motor Status, Phase Status, and On/Off motor control toggles
- Built interactive graph pages visualizing tank details such as refill count, duration, and runtime with real-time updates

i-Tank

- An IoT-based solution for real-time water level monitoring, device connectivity, and usage analytics, managed through an intuitive admin dashboard
- Enables efficient tracking, reduces water wastage, and ensures reliable water management

GCAM Garbage Management System

- Developed role-based dashboards for Super Admin, Admin, and Users showing garbage levels, counts, and detection alerts
- Built interactive report pages organizing data for Organizations, Sites, Users, and Devices with real-time updates
